

- The highest collagen content on the market – 10 000 [mg]
- The highest quality Swiss collagen
- The highest availability – 95% - thanks to hydrolysis 2000 [Da]
- No preservatives
- Only natural ingredients
- A daily recommended dose of collagen in one bottle
- The highest quality production in Austria

Collagen accounts for 30% of human protein and for as much as 70% of protein in skin. When you are 25 years old, your body starts losing the ability to regenerate it. Symptoms of collagen deficit are visible as the loss of skin firmness, worsening of your hair and nails condition and a decrease in the fitness of your joints.

The phenomenon of collagen, called the protein of youth, lies in that it contains up to 20 times more proline, glycine as well as hydroxyproline and hydroxylysine compared to other proteins. It contains 8 out of the 9 essential amino acids which the human body does not produce.

Owing to the innovative technology in which collagen is hydrolysed down to 2,000 Da molecules, it is 95% absorbable, thanks to which any deficit can be made up.

One bottle of Collibre Collagen Drink, containing as much as 10,000 mg of collagen, consumed daily for at least 1 month, will significantly reduce a deficit.
