LUBDOM Construction Fair

2017-01-09 10:09:48

XXXVII edition of LUBDOM Construction Fair will be held from 24th till 26th of March, 2017. The fair is one of the key events for the construction industry in Eastern Poland. It attracts a large group of visitors since its scope is constantly growing. The programme of the event merges the tradition in the construction industry with the newest technologies. The previous edition of the fair was visited by over 8 000 visitors. The group included specialists and individual clients.

XXXVII edition of LUBDOM Construction Fair will be held from **24th till 26th of March, 2017**. The fair is one of the key events for the construction industry in Eastern Poland. It attracts a large group of visitors since its scope is constantly growing. The programme of the event merges the tradition in the construction industry with the newest technologies. The previous edition of the fair was visited by over 8 000 visitors. The group included specialists and individual clients.

The businesses presented in the fair show the structural elements, walls, facades, materials, chemicals used in construction engineering, installations (sanitary installations, heating systems, electrical installations, water and drainage systems), fenestration joinery (doors, windows, gates, facades), construction services, consulting, roofs as well as finishing works. As always, LUBDOM will be accompanied by lectures, debates, discussions and trainings addressed to the individual clients and specialists from the construction industry.

An increasing trend for intelligent and passive house construction has inspired the organizers to enrich the programme of the event with new elements. The theme for LUBDOM 2017 is an energy-saving house which is friendly for people and for the environment. The novelties of the XXXVII edition are; the prosumer energy zone and the energy-saving construction zone. The exhibitors in the zones will be the representatives of the firms working in the passive house construction, septic drain field construction, intelligent building management system and renewable energy.

Moreover, the fair will show an interior shop offer (namely; decorations, furniture, lighting and textiles) as well as the items used in designing leisure areas for children and adults (for instance; the elements of play grounds, recreational areas, green areas and outdoor gyms). Furthermore, the exhibition part of the fair will include a show zone. In this part of the fair, the visitors will get a chance to observe the construction machines and tools in action. They will also have a possibility to test the equipment.

LUBDOM Construction Fair will be accompanied by **LUBDREW Woodworking Fair** and **Housing and Real Estate Fair**. The former, LUBDREW, is addressed to the professionals from the wood industry. During this event, the exhibitors will show the machines, tools and software for the sawmill industry, woodworking and wood transport. Housing and Real Estate Fair gives the visitors a chance to see the offers of the leading developers, banks and real estate agents. This cooperation of the construction, wood and real estate businesses opens up many possibilities. It is a complex event which gives the participants a fuller recognition of the market.
