Lemigo

2019-05-29 11:42:27

Lemigo is a family corporation, with a completely Polish capital. Within 29 years our company has had a huge success on the domestic market, as well as on the international arena, becoming one of the most appreciated producers.

The company uses modern, intelligent machinery and materials, exported only from Polish producers, which guarantee the manufacture of exclusive, high quality footwear. Specialists base on the latest trends in fashion do not only produce comfortable, but also good looking footwear.

The production of wellington boots by the Lemigo company was initially based around using PVC material, which is totally waterproof, watertight, long -lasting and simple to keep clean. This very universal material allows the production of everyday footwear, as well as footwear allocating to work, in horticulture, farming, gastronomy, processing fishing etc.

Our offer is complemented by the production of clogs. They are made from a super light EVA material which ensures high comfort in a range of different colours. We offer clogs for everyday use, domestic, for the swimming pool and beach, for garden works and those that meet safety standards, used in hospital, clinics, restaurants, hotels etc. A modern design and a variety of beneficial variations distinguish our clogs from those of competing companies.
