Lactelle sp. z o.o. is a producer of high-quality powdered milk products. The company operates in the Warmian-Masurian Voivodeship, where for many years cow breeding has been one of the most important agriculture branches. The company offers a wide range of products that are an excellent alternative to traditional skimmed and whole powdered milk. To meet expectations of the food industry and using the latest technologies, it constantly creates new innovative powdered milk products designed for various segments of the food industry such as production of ice cream, chocolate, bread, cakes, sweets, food concentrates, etc.

However, the scope of its business does not end there. The company is also engaged in trading in standard dairy products such as full cream and skimmed milk powder, whey protein concentrates (WPC), milk protein concentrates (MPC), buttermilk powder, whey powder, anhydrous milk fat (AMF), etc. Lactelle has a modern technological line equipped with a packing line as well as its own laboratory for testing raw materials and products.
